

ANOSHA ALI

Full-Stack Software Engineer

anoushaali2242@gmail.com | +92 300 9081465 | github.com/anoushaali1 | Pakistan (open to relocation)

PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on frontend development experience building user interfaces in React from wireframes and design mockups through to release. Comfortable working across the stack with Node.js, REST APIs, and PostgreSQL/MongoDB, with additional experience integrating AI/ML features into web and mobile products. Collaborative, fast-learning, and used to iterating on UI based on feedback in fast-paced, cross-functional team settings.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML, CSS, Flutter, Streamlit — UI built from wireframes/mockups, responsive design, iterative feedback-driven development

Backend: Node.js, Express, Flask, REST APIs, Socket.io

Databases: PostgreSQL, MongoDB, MySQL, Firebase

AI / ML: Machine Learning, Predictive Modeling, AI Application Integration, Conversational AI, Python

Testing & QA: API testing and debugging with Postman; functional testing of end-to-end features

Security: Role-Based Access Control, Authentication

Tools & Design: Git, GitHub, Figma, VS Code, StarUML, Canva — used for prototyping and maintaining visual/UI consistency

Languages: English, Urdu, Pashto

INTERNSHIP EXPERIENCE

IT Department Intern | *Pakistan Aeronautical Complex (PAC)*

- Designed and built the user interface and frontend logic in React for a secure, role-based authentication platform, connecting to backend services over REST APIs.
- Collaborated with backend developers to define API contracts and ensure the UI accurately reflected Admin and User access levels.
- Contributed to requirements discussions and design decisions in enterprise software planning meetings, tracking task progress through to delivery.
- Used Git/GitHub for version control while working in a collaborative, enterprise software environment.

PROJECTS

Open Debate App — Real-Time Live Debate Platform — *Flutter, Node.js, MongoDB, Socket.io, WebRTC*

- Built a full-stack, real-time application with a modular frontend/backend architecture, designing the UI from initial concept through to a working, structured debate experience.
- Implemented real-time WebRTC communication (video/audio/text) and low-latency, bi-directional updates with Socket.io for live features such as room creation and live winner announcements.
- Designed a modular Admin UI for system management, activity logs, and notifications, iterating on the interface based on usability feedback while managing app state and debugging real-time sync issues.

Tastemade — Recipe Web App — *React, Node.js, Express, MySQL*

- Built the frontend in React and a Node.js/Express backend, with REST APIs handling all frontend-backend communication and role-based access control distinguishing Admin and User permissions.
- Performed functional API testing with Postman to verify frontend features against backend behavior before release.

Vital Scope — AI-Powered Health Companion — *Python, Flask, Streamlit, Machine Learning*

- Built an interactive Streamlit interface so users could interact with integrated ML models predicting heart disease and diabetes risk.
- Developed Flask backend services to handle ML-powered predictions and application logic, and integrated a conversational AI chatbot into the UI to guide users through health queries.

BiteBook — Smart Recipe App — *Flutter, SharedPreferences, Mobile Application*

- Designed a Flutter-based recipe discovery app with category filtering, search, and a grid-based browsing UI, applying HCI principles for usability and visual consistency.
- Built BiteBuddy, an in-app AI assistant offering cooking tips, recipe Q&A, and ingredient substitutions, plus a meal recommendation system based on saved preferences.

EDUCATION

BS Software Engineering — COMSATS University Islamabad

CGPA: 3.44/4.0

FSc (pre-engineering) Quaid-e-Azam Group of Schools and Colleges

Result: 81.90%

Matriculation Quaid-e-Azam Group of Schools and Colleges

Result: 91.18%

ACHIEVEMENTS & CERTIFICATIONS

- Campus Honor Certificate — COMSATS University Islamabad
- Winner — Mobile Application Development Project Competition
- Winner — Computer Networks Project Competition
- Internship Completion Certificate — Pakistan Aeronautical Complex (PAC)
- Deloitte Forage — Data Analytics Job Simulation
- IBM SkillsBuild — Artificial Intelligence Fundamentals
- Adobe — AI Ethics & Introduction to Artificial Intelligence
- Microsoft — Microsoft 365 Copilot, Security Copilot

LANGUAGES

English • Urdu • Pashto
